

A world leader in gas detection and sensor technology for over 75 years.

Our technical fixed gas detection representatives are ready to help you design the safest and most cost-effective fixed gas detection system possible. RKI's qualified fixed system specialists can set up a virtual meeting or visit your facility to identify your exact hazards, determine site-specific requirements, and offer the optimal fixed system solution.

RKI or select partner's professional instructors are ready to provide you and your team training designed for your specific products and application. Training can include programming, calibration, testing relay logic, and maintenance.

Let RKI help you develop a plan to maintain your fixed gas detection system to keep you OSHA compliant. From calibration to relay functions, we can help make sure your fixed gas detection system does what it is intended to do—**SAVE LIVES.**

RKI's certified technicians and select partners can install the equipment in its entirety. Turn-key means you never have to touch a screwdriver. RKI and select partners can do it all – explosion proof, non-explosion proof, hang conduit, pull wiring, use advanced relay logic, programming, connect ancillary equipment, low voltage, high voltage, calibrations, etc.

RKI or select partner confirms wire termination, programs system per customer's requirements, calibrates, tests relay function, and trains end user.

Gas Detection for Life

Dear Customer,

RKI Instruments, Inc. is an innovative gas detection company located in Union City, California. RKI was established in 1994 by Sandra Gallagher and myself. We both believe that customers and distributors deserve a reliable source for advanced gas detection equipment as well as solutions to specific gas monitoring applications.

RKI is partnered with Riken Keiki Co. Ltd., the world leader in gas detection and sensor technologies. In business for over 80 years, Riken has sold over 1.8 million portable and fixed gas monitors worldwide with annual sales exceeding \$260 million. They have over 700 employees, a large number of which are engineers and scientists. RKI is the exclusive North American supplier of Riken products.

Every year, RKI has continued to achieve a high level of growth which is attributed to our sales and support of Riken products and the ability to develop our own line of products around Riken's long lasting sensors. This capability of sales, support, and development is made possible by our seasoned professionals. RKI employees average 14 years of gas detection experience, and the top 8 executives combined industry experience totals over 240 years.

This combination of quality products and knowledgeable supportive people provides you with the ability and opportunity to confidently face almost any gas monitoring application, with equipment built to last. When you call RKI, you will get solutions and answers to your gas detection needs.

RKI provides Gas Detection for Life. Not only will our equipment protect your life and property from the hazards of gases and vapors, but with proper care, it may also be the last gas detector you will ever need to purchase.

Sincerely,

Bob Pellissier  
President
