

Gas Detection For Life

Distributor Announcement

October 16, 2017

RKI Lowers Price of GX-2009 to

\$595

RKI is pleased to announce that we are lowering the list price of our Model GX-2009 by \$100. This means that a standard 4 gas unit with charger will drop from \$695 list to \$595 list. This new pricing is effective immediately, for all orders placed as of October 16.

The GX-2009 has several notable benefits over the competition:

- Smallest and lightest 4-gas on the market
- Excellent long life sensors: 3 years+ typical for LEL and Oxygen, 3 to 5 years for H2S and CO
- Not a disposable! High quality and reliability. The GX-2009 should last for 5 to 10 years with proper care
- Lowest cost of ownership of any 4-gas portable on the market. Sensor prices lower than most competitors
- RKI's same day / next day shipment
- Friendly customer service and technical sales support

Please see the following link for the new GX-2009 price list
