

# Gas Detection For Life

## Distributor Announcement

March 5, 2018

## Larger Discounts for GX-2012

### *Effective Immediately*

For US and Canada distributors

The GX-2012 just got a lot more attractive. Effective immediately the standard distributor discount for GX-2012 is now 35%! This will help the GX-2012 be more price competitive with the 4-gas monitor with an internal sample drawing pump market. Not only has the standard discount been increased, but quantity discounts have also been enhanced. Purchase 5 to 9 instruments and get a 38% discount. Purchase 10 or more and receive 40% off. This is ideal for stocking distributors.

When competing against the other 4-gas instruments with internal sample pumps, remember that the GX-2012 has several features that separate it.

- 3 operating modes: Normal, Leak Check, and Bar Hole sampling
- Auto-ranging combustible monitoring from % LEL to % volume ranges
- PPM level combustible leak detection with CO levels displayed
- TC sensor available for % volume measurement

Normal Mode

Leak Check Mode

Bar Hole Mode

When you place an order for any GX-2012 that has one “ship to” location, the following discounts will automatically be applied based on the quantity ordered.

This discount program supersedes all previous schedules or special pricing offers.

## ***Instrument Discounts***

For instrument only purchases, the following discounts apply. Each order must ship complete to one location.

Order Quantity	Discount
1 - 4	35%
5 - 9	38%
10 >	40%

## ***Instrument Bundled with Accessories Discount***

For part numbers where a GX-2012 is bundled with accessories, the following discounts apply. For example part #72-0290-22-C-50 is a GX-2012 with a charger and carrying case. This part # will receive the following quantity discounts.

Order Quantity	Discount
1 - 4	35%
5 >	38%
