Special Attention Combinations

Listed below are some gas combinations that can be installed into one GX-6000 but that have limitations of operations that must be discussed and understood by the customer prior to purchase. Some have special filters installed for improved specificity.

A.	SO ₂ / NO ₂ *	9 ppm NO ₂ reads -10.4 SO ₂ 6 ppm SO ₂ reads -3.8 ppm NO ₂
B.	Cl ₂ / SO ₂	6 ppm SO ₂ reads 3 ppm Cl ₂
C.	NH ₃ / NO ₂	9 ppm NO ₂ reads -5.7 ppm NH ₃

* This combination is only practical if only one gas is present at a time due to cross interference.

Impractical Combinations

Some combinations of gases are not practical in the same GX-6000 due to interference issues. If you do not see the combination you want in the price list, please consult the factory. Please see below for BAD combinations (not practical) or combinations which require special attention.

A.	HCN / SO ₂	6 ppm SO ₂ reads 11.4 ppm HCN
B.	HCN / NO ₂	9 ppm NO ₂ reads -20.8 HCN
C.	H ₂ S / Cl ₂	H ₂ S suppresses Cl ₂ reading

EAGLE 2 Portable Series

EAGLE 2 One to Six Gas Portable

The EAGLE 2 can be ordered with up to 6 gas sensors. Please specify the gas combination when ordering. Ask factory for combinations not listed. All versions listed below are supplied with alkaline batteries, and include a hose, probe, shoulder strap, and instruction manual. All versions also include an internal hydrophobic filter as standard. For NiMH batteries, charger, or other accessories, please review the notes below for these optional accessories.

Each Instrument Price Includes the Following Items:

Part#	Description
80-0131RK-10	Probe, 10", hydrophobic, standard, with particle filter and metal fittings, EAGLE / EAGLE 2
80-0131RK-20	Probe, 10", hydrophobic, standard, without particle filter, with metal fittings, for EAGLE 2 with PID
80-0505RK	Hose, 5' polyurethane with fittings (standard gas versions only), EAGLE / EAGLE 2
80-0605RK	Hose, 5' teflon lined, with fittings (PID versions only), EAGLE / EAGLE 2
13-0100RK	Shoulder Strap with RKI logo, EAGLE / EAGLE 2
33-0173RK	Filter, internal, hydrophobic, EAGLE 2
49-1130RK	Battery, C size, alkaline battery

Rechargeable Batteries

The standard EAGLE 2 comes with alkaline batteries. To order with rechargeable NiMH batteries instead, order the batteries and charger as a separate line item along with your EAGLE 2 order. Please see the ACCESSORIES page for the various charger options available.

For example, use part # 49-2175RK-01 at \$170.00 list price to add NiMH batteries and an AC charger when ordering.

Data logging

Standard in all EAGLE 2 units, and the data log software is a free download from RKI's web site. A standard IrDA / USB adaptor cable is also required to download data (47-5084RK-01).

Methane Elimination

All EAGLE 2 units have capability of methane elimination if calibrated to hexane. Access to the methane elimination mode is done using the Display Mode. Please specify when ordering if methane elimination will be used. The instrument will be shipped calibrated to hexane.

See a complete list of **Calibration Stations on page 70**

See a complete list of **Calibration Equipment on page 70**

See a complete list of **Replacement Sensors on page 69**

Calibration Notes

LEL Calibration Note

Standard factory calibration of LEL / PPM ranges is to Methane (calibration to hexane, isobutane, or other gases is optional). If planning to use the methane elimination function, calibration must be to hexane.

Please specify calibration when placing orders, if calibration to something besides methane is desired.

PID Calibration Note

Standard factory calibration of PID sensors is to Isobutylene.

Special Notes For Super Toxic EAGLE 2 Units

Some SUPER TOXIC gas versions have longer lead times than others. Please confirm availability of the SUPER TOXIC versions, or any versions, if delivery time is critical.

TC and CO2 Ranges

All EAGLE 2 units configured with a Thermal Conductive or Carbon Dioxide sensor will have a part number suffix, -XX, which indicates one of the available ranges:

TC and CO2 Ranges

TC Ranges

Gas	Range	Part # Suffix
H2	0 - 10 % vol	-10
H2	0 - 100 % vol	-20
CH4	0 - 100% vol	-30

CO2 Ranges

Gas	Range	Part # Suffix
CO2	0 - 10,000 ppm	-02
CO2	0 - 5.0 % vol	-03
CO2	0 - 60.0 % vol	-05

Please specify the desired suffix or range when ordering. Pricing is the same for all ranges.

Impractical Combinations

Some combinations of gases are not practical in the same EAGLE 2 due to interference issues. If you do not see the combination you want in the price list, please consult the factory. Please see below for BAD combinations (not practical) or combinations which require special attention.

Impractical Combinations

A.	H2S / PH3 or H2S / AsH3
B.	H2 / CO
C.	H2S / Cl2
D.	30% volume HC / CO
E.	PID / % vol HC IR

Special Attention Combinations

Listed below are some gas combinations that can be installed into one EAGLE 2, but that have limitations of operations that must be discussed and understood by the customer prior to purchase. Some have special filters installed for improved specificity.

Special Attention Combinations

A.	H2S / SO2
B.	H2S / NH3
C.	AsH3 / HCN
D.	AsH3 / CO
E.	SO2 / NH3
F.	HCN / H2S

EAGLE Sample Drawing Versions

The EAGLE™ can be ordered with up to 6 gas sensors. Please specify the gas combination when ordering. Ask factory for combinations not listed. All versions listed below are supplied with alkaline batteries, and include a hose, probe (if applicable; not used with some versions due to absorption reasons), shoulder strap, instruction manual, and training CD. Many versions also include an internal hydrophobic filter as standard (for versions where the internal hydrophobic filter will not fit, it will be provided externally). For Ni-Cads, charger, data logging, larger internal hydrophobic filter or other accessories, please review the notes below for these optional accessories.

See "EAGLE Replacement Parts & Accessories" page 87.

All Eagle Instrument Price Includes

80-0505RK	Hose, polyurethane 5' (standard gas versions and some super toxic versions only)
or

13-0100RK	Shoulder Strap
33-0165RK	Filter, Millipore, PTFE, Disc type, Hydrophobic (New standard as of June 2002, most versions)
49-1140RK	Batteries, size D, alkaline (instrument requires 4)
80-0131RK-10	Probe, 10", hydrophobic (standard gases and some super toxic versions only)
or	
80-0132RK-10	Probe, 10", hydrophobic, for some super toxic versions (not for F2, HF, or O3)

Ni-Cad Batteries

To order an EAGLE with Ni-Cad batteries and 115VAC charger, order part number 49-2150RK-01 at \$160.00 along with your instrument. This part number includes the charger and the batteries. To add Ni-Cads and charger to an EAGLE you already have, please order the batteries and charger separately (see Optional Accessories).

Data logging

No longer available for the EAGLE.

Methane Elimination Switch

All EAGLES with a catalytic hydrocarbon sensor have an internal Methane elimination switch, for environmental applications. (This switch is not operable for instruments calibrated to Methane). If desired, this feature can be brought out to an EXTERNAL switch. For an EXTERNAL switch to be added, please specify part number 75- 0001RK (\$95.00) with your order.

Extra Loud Buzzer

An extra loud buzzer can be installed in any EAGLE for use in high noise areas. This buzzer is 90 db @ 2'. To add, use part number 52-1017RK-01 when ordering instruments, \$85.00. (NOTE: This buzzer cannot be added to an EAGLE that also has data logging added).

Standard Internal Hydrophobic Filter (Millipore)

Almost all versions of the EAGLE are equipped as standard with a Millipore hydrophobic filter (part # 33-0165RK) inside the unit. For customers with particularly dusty applications, or for those who want a larger filter, use the High Capacity Hydrophobic / Dust Filter detailed below.

High Capacity Hydrophobic / Dust Filters (AcroPac)

A special high capacity hydrophobic & dust filter (Part # 33-0171RK) is available for the EAGLE. To purchase an EAGLE with the AcroPac filter installed, add part number 33-0171RK-01 to your order. This filter is large and can only be used in an EAGLE with LEL/O2/H2S/CO and no super-toxics, or an EAGLE that has super-toxic sensors but no sensors for LEL/O2/H2S/CO.

EAGLE Portable Series

CO2 Ranges

All EAGLEs configured with a Carbon Dioxide channel will have a part number suffix, -XX, which indicates one of the 5 available Carbon Dioxide ranges:

CO2 Ranges

Range				Part # Suffix
0	-	5,000	ppm	-01
0	-	10,000	ppm	-02
0	-	5	%	-03
0	-	20	%	-04*
0	-	60	%	-05*

*Note: Some EAGLE configurations do not support the 0-20% and 0-60% CO2 ranges, consult RKI Instruments, Inc.

Please specify the desired suffix or range when ordering. Pricing is the same for all ranges.

LEL Calibration Note

Standard factory calibration of LEL / PPM ranges is to Methane (calibration to hexane, isobutane, or other gases is optional). For units provided with an external Methane elimination switch, calibration is to hexane.

Please specify calibration when placing orders, if calibration to something besides methane is desired.

Special Notes For Super toxic EAGLES

Some SUPER TOXIC gas versions have longer lead times than others. Please confirm availability of the SUPER TOXIC versions, or any versions, if delivery time is critical.

Probes and Hoses for Super toxic EAGLES

Note that due to absorption issues some versions with super toxic sensors (Br2, ClO2, F2, HCl, HF, and O3) have different hose fittings than the standard 4 gas units. These versions also are supplied with only 3' of teflon tubing as standard, and some versions (F2, HF, and O3) cannot be used with a probe due to absorption, so they will come without a probe.

Impractical Toxic Gas Combinations

EAGLE Replacement Sensors

NOTE: Different EAGLE toxic sensors are available for the same gas in some cases. **When ordering replacement sensors, it is essential to get the sensor type numbers off the old sensor**, or else the incorrect sensor may be purchased. Different sensor types, or gas types, are not interchangeable without also changing the amplifier board and possibly other hardware.

Calibration Equipment

Regulators For 17 / 34 L Steel Cylinders

Regulators are necessary equipment used to accurately deliver calibration gas from a cylinder to an instrument. Each regulator is designed to fit on a specific set of cylinders. Most of the RKI regulators are designed for non refillable cylinders. There are two common fittings these regulators use to connect to the non refillable cylinders. One common fitting is a CGA 600 connection and fits on the 17 (no part number suffix) & 34 (-01 part number suffix) liter steel cylinders. Make sure the regulator you purchase fits the cylinder you have.

These Regulators

Calibration Equipment

Regulators For 34L / 58L / 116L Aluminum & 103L Steel

The second common fitting is the 5/8 x 18 UNF fitting which connects to the 34 & 58 liter aluminum cylinders (-04 & -02 part number suffix) and the 58 & 103 liter steel cylinders (-05 & -03 part number suffix). Make sure the regulator you purchase fits the cylinder you have.

Calibration Equipment

Knobs and Gauges

Regulators can be equipped with an on / off knob or a pressure gauge to show how much gas is in the cylinder. Most of the Low Volume (-LV) type cal kits are equipped with regulators that include an on / off knob and a pressure gauge, in order to offer the easiest to use calibration kit.

Cylinders

Cylinder part numbers have a 2 digit suffix which indicate the cylinder size for that particular gas mixture. The 2 digit suffix numbers indicate the following cylinders:

Part # Suffix	Cylinder Size
no suffix	= 17 liter steel cylinder (17L)
-01	= 34 liter steel cylinder (34L)
-02	= 58 liter aluminum cylinder (58AL)
-H02	= 58 liter aluminum cylinder (58AL, 1000 psi)
-03	= 103 liter steel cylinder (103L)
-04	= 34 liter aluminum cylinder (34AL)
-H04	= 34 liter aluminum cylinder (34AL/44ES, 825 psi)
-05	= 58 liter steel cylinder (58L)
-116	= 116 liter aluminum cylinder (116AL)

Calibration and EAGLE Upgrade Services

Many instruments are sent to us for just a general checkup and calibration. If no additional repair work, extra parts or sensors are required to perform this service, then RKI's calibration services can apply. In this case, if you send a "not to exceed" purchase order to RKI along with the instrument, your repair time will be expedited. Using standard calibration and Eagle upgrade services eliminates the need for the service department to obtain an approval, which gets your service order back to you much faster.

Please remember to always complete an RKI Service Order Form with every repair, even for standard calibration services. This form can be found on RKI's web site, or one can be faxed or emailed to you.

STEPS FOR CALIBRATION AND UPGRADE ORDERS:

1. Select the appropriate calibration services for your instrument model from the *Services For Portable Instruments* or *Eagle Upgrades* sections.
2. Complete an RKI Repair Form specifying your service, a "not to exceed" figure, and a purchase order number.
3. Return instrument to RKI with the completed Service Order Form.
4. RKI will complete the service indicated and promptly return it to you, as long as no other parts or repair work are required.

If additional parts or service work are required that exceeds your "not to exceed" amount, then RKI will create an estimate for your approval. You may then either give authorization to RKI to add the additional charges to the original PO, or supply a new PO to cover the new total costs. If you know that certain parts or sensors will be required prior to sending the instrument to us, you can also expedite the service by including the cost of those sensors or parts on the original purchase order sent to us with the instrument.

Services For Portable Instruments

Select the appropriate service for your instrument model from the list below. Complete an RKI Service Order Form indicating service required, a "not to exceed" figure, and a purchase order number. Return instrument to RKI with the completed Service Order Form. Prices include inspection, testing, cleaning and calibration. These prices assume that no additional sensor replacement, parts or labor is required. If an instrument is extremely dirty, requires replacement parts, sensors or additional labor, an estimate will be provided documenting additional work required.

Calibration certificate is included with every instrument repair.

Upgrades

For EAGLE OR EAGLE 2 upgrades adding super toxic sensors, contact RKI Applications Department to confirm that the gas combination you need is practical. Or find the part number for the version you want in the EAGLE section of this price list to confirm it is a viable combination. **Eagle upgrades are not eligible for the expedite program.**

Please use the following guidelines for quoting and handling EAGLE upgrades from one configuration to another.

The pricing below includes all parts, calibration, and labor required to convert an EAGLE that is complete and in good working order, and that does not need any additional repairs, parts or sensors replaced. If additional parts, sensors or labor is required an estimate will be provided. Approval of the estimate is required before upgrade can be completed.

For upgrades that include adding super toxic channels, the part number utilizes a suffix to indicate the specific super toxic gas being added. For example, to add a chlorine channel to an EAGLE, the upgrade part number would be 91-1000-CL2. To add 2 super toxic channels, use a separate line item for each channel. Specify the 91-1000-XXX part number for each new channel and total each individual price.
